| EVALUATION CRITERIA                    | SCORE<br>(0-10) |
|--|-----------------|
| 1. Relevance of Topic                  | 6               |
| 2. Scholarly Quality                   | 6               |
| 3. English Usage                       | 6               |
| 4. Use of Theory                       | 7               |
| 5. Novelty and Originality of the idea | 5               |
| 6. Technical Content and Correctness   | 7               |
| 7. Critical Qualities                  | 6               |
| 8. Clarity of Conclusions              | 6               |

|                      |        |
|----------------------|--------|
| <b>TOTAL SCORE %</b> | 61.25% |
|----------------------|--------|

### RECOMMENDATION

ACCEPT

**ACCEPT WITH MINOR REVISIONS**

ACCEPT WITH MAJOR REVISIONS

REJECT

The following are indicative score ranges:

\* Accept (without qualification): 75-100%

\* Accept with minor revisions: 55-75%

\* Accept with major revisions 35-54%

\* Reject: Below 35%

## REFeree'S COMMENTS

### Referee Comments:

1. The results are not significant enough. Comprehensive evaluations are needed. Authors should present the experimental **results** and its corresponding analysis in **detail** supported by **graphical and tabular** data.
2. The **text labels in all the figures** used in the paper **are unclear**. Authors must develop original **image/figures** with **high resolution** for proper rendering of the final published paper and should not distort on zooming. The text labels in the images must be clearly visible.
3. Very **fewer references** are used. **The literatures study is minimal** with respect to the research availability. Authors must focus on **referring more recent journal papers to include further study**. This also provides a **comparative study** which ultimately enhances the paper quality.
4. **Conclusion** needs to be **elaborated** mentioning the future scope of the idea.
5. **The research paper should be written in perspective of third person**. Words such as 'I' 'we' 'our' etc. needs to be avoided.
6. The **Experimental analysis** in the paper is **minimal**. Authors should present the research with detailed analysis.
7. The **presentation** of the paper needs improvement. The paper does not comply with the IJCA paper template.

The paper is **suitable for publication** with IJCA after **minor revisions**. Use **IJCA paper template** for preparation of **camera ready copy (CRC)** of the paper.

### Final Checklist for authors:

- Perform Spell and grammar check.
- No word breaks at the end of lines.
- References appear consecutively in the paper.
